Soapstone — earth friendly, people friendly
Fireplaces, Countertops, Sinks & Tiles

Tulikivi makes the most efficient, cleanest-burning fireplaces in the world. The secret is our soapstone, perfected over billions of years deep within the hills of Finland. Each fireplace is not only designed to take full advantage of soapstone's unrivaled heat-retention properties, but sculpted to be a true work of art adding a lifetime of value and beauty to any home. Besides building fireplaces, WarmStone Fireplaces and Designs also provides soapstone countertops, tiles and sinks to homes throughout Montana and the Rocky Mountain region. Soapstone is heat and stain resistant and requires little maintenance. The natural beauty and durability of soapstone complements any style of home from modern to rustic—making soapstone friendly for the home, people and environment.
